#### Uptime

Shows if your website is available.

#### Context menu

- Prepare update
- Add reminder
- Refresh system information
- Quicklinks

To activate it, position the pointer on a closed installation and use the right mouse button or the secondary click.

#### Multiple selection

Click on the icon to select an installation. Then select an appropriate action in the action field.

#### List item

Title, uptime, Contao version, PHP version, labels  
Click to access the details (see page 2)

#### Log viewer

The log files of the connected Contao installations are collected and the error messages are clearly displayed in the log viewer.

The screenshot shows the trakked.io dashboard. At the top, there are tabs for 'Installations', 'Updates', 'Logs', and 'Organisations'. A '+ Add an Installation' button is in the top right. The main area displays a list of installations, each with a status icon (green for up, orange for paused, red for down), a traffic light indicator, and a bar chart for uptime. A context menu is visible over the list, showing options like 'Prepare update', 'Add reminder', 'Refresh system information', and 'Quicklinks'. A 'Multiple selection' box indicates '2 installations selected'. A 'Log viewer' is open for one of the installations, showing error messages. The sidebar on the right includes a 'User' section with 'Dark Mode', 'Settings', and 'Logout' options, and an 'Adjust labels' section for sorting and renaming labels. A 'Filtering' section at the bottom right shows a filter for 'isotope/isotope-core 2.8'.
